

Automatic Juicing System

Automatic juicing systems are available as an add-on to all of the following ArilSystem models: JU10, JU20, JU28, JU56. Juice output is estimated at 200–1000 liters/hour, depending on infeed rate and juicing equipment.

The system includes:

Eccentric screw pump and feed screw
Belt press
Inline filler (by gravity or pump)
Capper for PET bottles
Automatic labeling
Rotary table (for collecting filled, capped and labeled bottles)

General Rate:

200-1000lt/hour

Belt Press:

Capacity - up to approx. 800 /hour (depending on fruit and ripeness).

Inline Filler:

Quantities: 0.2-2.0L

Capacity: 1000 1L-bottles /hour

Capping:

Capacity - up to 2500 bottles /hour

Labeling:

Type: varying size bottles or jars

Capacity: 600 bottles /hour
