

Integrated Automatic Packaging System

Integrated Automatic JU-Packaging Systems, adapted to specific ArilSystem models, use a unique and highly accurate volume-filling and sealing process, providing best results with minimum mechanical damage to arils. Weight accuracy (subject to variation) is approximately +/- 4%.

The system includes:

Arils inlet conveyor

Sealed packages outlet conveyor

Automatic filling and sealing machine

Rate:

Up to 140 sealed packages/minute

Capacity: 70-250g/package

Operators:

Minimum 1

Space Requirement:

Minimum space requirement 15m²

Air Pressure:

Compressor capacity: 10 CFM

Pressure: 7 bar

Oil free, dry air

Electrical Supply:

3 phase, 380V, 16A

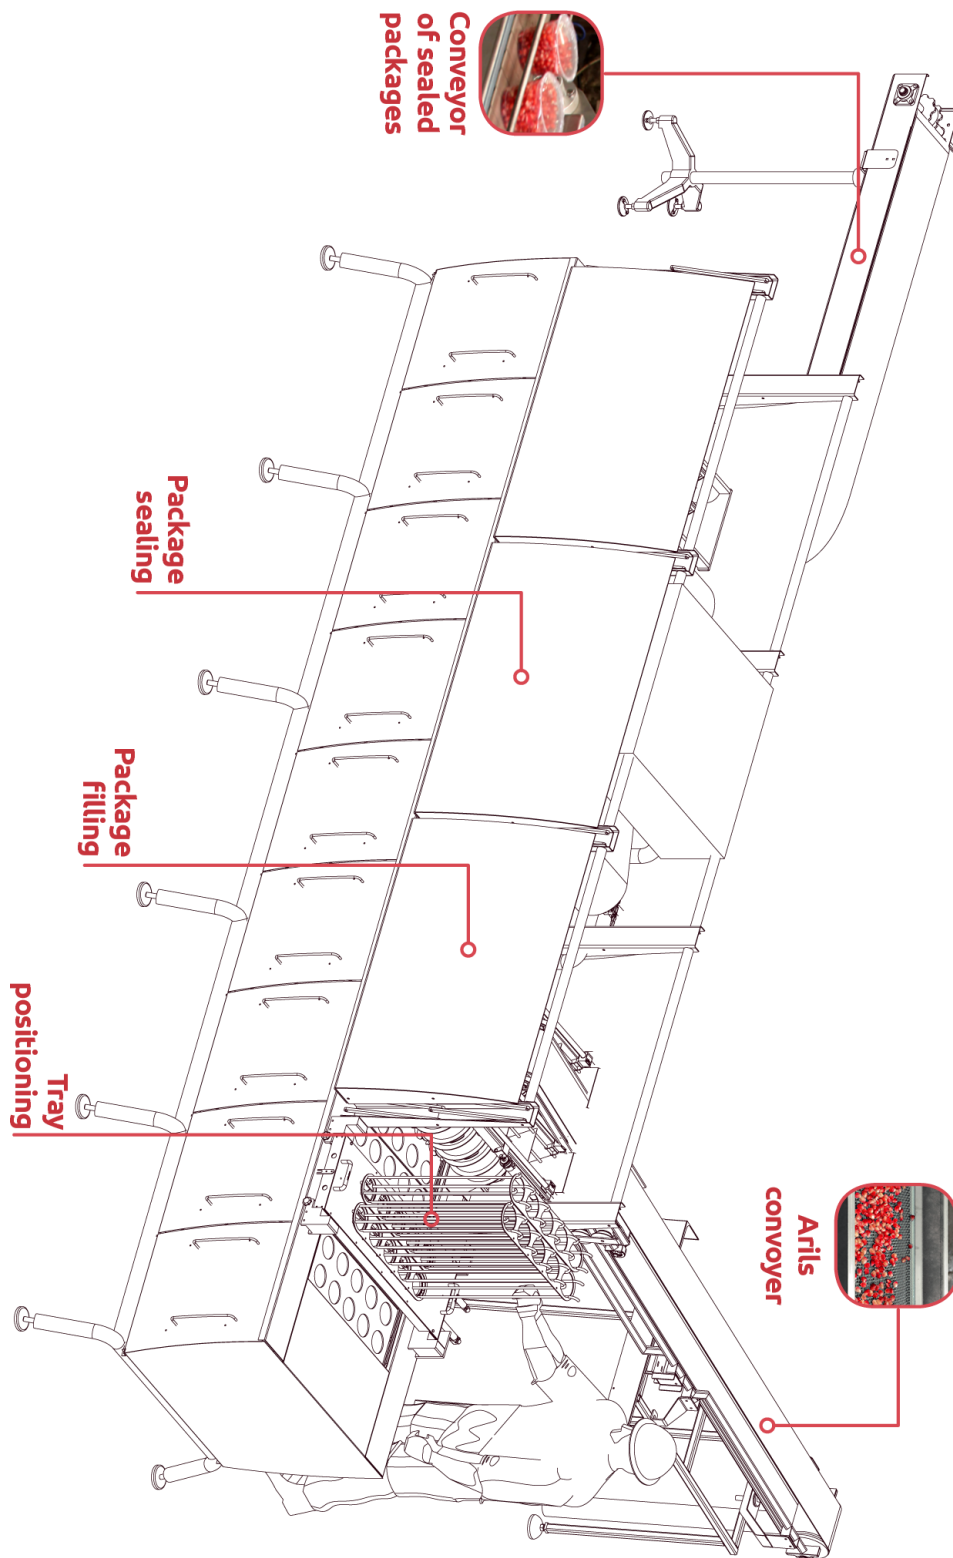

**Optional: MAP control atmosphere*
